Villas in Oberbozen

Aluminium window walls in two single-family houses

Extremely narrow profiles and large window areas harmonise in these two villas in Oberbozen with their striking gabled construction, giving the façade a distinctive structure. The aluminium windows and large window walls create bright and airy interiors with plenty of light. The Nova-line Plus design reduces the frame outline to a minimum: only the window glass seems to be there. Excellent insulation and high noise and burglar protection are nonetheless guaranteed.
