Single-family house in the Rhine-Main area

FIN-Vista, FIN-Project, FIN-Door – it couldn't be clearer!

This modern single-family home is characterised by its clear lines, angular forms and uninterrupted views as far as the eye can see. The puristic construction sets the architecture the task of linking outside and inside in such a way that the boundary appears to flow between the two. Windows and window walls naturally play a leading role in this context – and not only in terms of façade design: the windows also constitute an essential part of the interior design. Given the large glass areas, the clients wished to ensure a high degree of resistance to break-ins and excellent thermal insulation for the windows.

The FIN-Vista window wall is ideal for meeting both requirements and, thanks to its slender frame profiles, also looks extremely elegant. The modular mullion-transom look means it can be combined with all windows, sliding and folding doors – in this case with the smart FIN-Project Nova-line aluminium windows and the entry door in aluminium. The new building – despite its angular design – presents an all-round harmonious aspect.

Type of building	Single-family dwelling
Construction	2015
Project Planning	New build/conversion Müller+Kölsch
Country	Germany
Region	Rhine-Main area
Locality	Bad Vilbel
Photographer	Jörg Hempel

Products used

U_w - Heat transmittance coefficient of window element

R_w - Sound insulation properties of a window

npd - No performance determined

FIN-Project Nova-line 78/88

aluminium-aluminium

U_w 1-sash 2-/3-glazing:

1,2 / 0,82 W/m²K

U_w 2-sash 2-/3-glazing:

1,2 / 0,94 W/m²K

R_w Standard:

38 (-2;-6) db

R_w Best value:

41 (-3;-7) db

FIN-Vista

aluminium-aluminium

Modular mullion-transom system for window walls. Can be combined with all windows, sliding and folding doors.
