

FIN-Window Step-line 90
uPVC-uPVC

New build in Bozen

Efficient homes with FIN-Window and FIN-Vista.

Warm, light brown tones for the façade, white frames and sober forms for the windows and doors. There is also elegant stairwell glazing that creates a flowing link between the two building halves: the atmosphere of this ten-storey residential complex in Bozen is beautifully comfortable and harmonious.

The products installed both enhance the building's aesthetics and guarantee a high degree of living comfort. The large glass façades in the stairwell, plus the numerous windows with their slim contours and lower lights, ensure light and airy interiors. Energy and cost efficiency were also central factors in planning. The uPVC and aluminium materials chosen for the exteriors of the windows and window walls are watertight, durable and weather-resistant. The satin-finished uPVC surface on the interior, only available from Finstral, is pleasant to the touch as well as easy to maintain. FIN-Window and FIN-Vista are investments for efficient living spaces for decades to come.

Type of building	Multiple-family dwelling
Construction	2017
Project	Window replacement
