

FIN-Project Nova-line Plus 78/88
aluminium-aluminium

Former riding arena in Landau

The charm of the old, the gleam of the new: a successful (FIN) project!

Once upon a time this was the scene where many a fine horse was honoured – now it is the turn of the protected riding hall in Landau to receive an award: the building, selected for the “2019 Day of Architecture”, was converted for use by students of fine arts at the University of Koblenz-Landau. The ground floor is now home to classrooms and workshops, while the two upper levels have open loft-like studio rooms.

The architecture is marked by its contrasts between new and old – both inside and outside. The windows play a central role in all of this: the large FIN-Project windows in aluminium-aluminium are presented in the Nova-line Plus design, with wide glass areas that offer plenty of light! Nor was any compromise made when it came to thermal insulation: the building meets KfW Efficiency House 70 standards!

Type of building	Public building
Construction	2018
Project	Monument/ensemble
Planning	Thorsten Holch, Architekt
Country	Germany
Region	Rheinland-Pfalz
City	Landau
Photographer	David Franck Photographie

Products used

U_w - Heat transmittance coefficient of window element

R_w - Sound insulation properties of a window

npd - No performance determined

FIN-Project Nova-line Plus 78/88

aluminium-aluminium

U_w 1-sash 2-/3-glazing:

- / 0,77 W/m²K

U_w 2-sash 2-/3-glazing:

- / 0,91 W/m²K

R_w Standard:

33 (-1;-4) db

R_w Best value:

43 (-2;-6) db

FIN-Vista

aluminium-aluminium

Modular mullion-transom system for window walls. Can be combined with all windows, sliding and folding doors.

U_w 1-sash 2-/3-glazing:

1,3 / 0,81 W/m²K

R_w Standard:

34 (-2;-6) db

R_w Best value:

44 (-2;-6) db
