## New hotel build near Brixen

Holiday architecture with FIN-Project, -Vista and -Door.

Until quite recently there stood a hotel in traditional architectural style below the Plose skiing area – but none of it is now recognisable. The construction of the “anders mountain suites” saw a bold and radical new beginning. With its seven suites, the hotel redefines holiday architecture as South Tyrolean hospitality meets urban architecture – inside there is design, outside there is nature.

The extensive FIN-Vista window walls and FIN-Project aluminium windows with their glass-covered frames, grant the widest possible views of the breathtaking Dolomites and provide a tactful frame for the natural surroundings. The large glass surfaces offer a calming counterweight to the lively curved shapes of the façade. The steel reinforcement that is part of all FIN-Vista plastic profiles makes the frames particularly resilient, while the structurally necessary construction depth is generally smaller. The rooms are secured by plain glazed FIN-Door entry doors.

# Products used

$U_w$  - Heat transmittance coefficient of window element

$R_w$  - Sound insulation properties of a window

**npd** - No performance determined

## FIN-Project Nova-line 78/88

*aluminium-aluminium*

$U_w$  1-sash 2-/3-glazing:

1,2 / 0,82 W/m<sup>2</sup>K

$U_w$  2-sash 2-/3-glazing:

1,2 / 0,94 W/m<sup>2</sup>K

$R_w$  Standard:

38 (-2;-6) db

$R_w$  Best value:

45 (-1;-4) db

## FIN-Vista

*aluminium-aluminium*

Modular mullion-transom system for window walls. Can be combined with all windows, sliding and folding doors.
