

FIN-Window Nova-line 77
uPVC-uPVC

Individual home in Basque Country

Eye-catchingly colourful window shutters and entry door.

This building shows its true colours! Both the aluminium entry door and the folding uPVC shutters are a bright traffic red: this eye-catching colour gives the house a rustic style, while the white windows create a moderating effect thanks to the slender uPVC frames with their frame-covering all-glass look. In this way, the traditional rustic style is combined with a modern look in an intense and subtle play of colours.

Certified as a passive house, the structure is plastered on the inside with airtight joints for better insulation; the ventilation system also features a heat recovery technique. The triple glazing further increases the insulation which, in combination with the folding shutters, keeps the heat out in summer and ensures a pleasant coolness indoors. Then, in winter, the light and airy rooms also offer a natural warmth – making for a perfect, colourful home at any time of year.

Type of building	Single-family dwelling
Construction	2023
Project	New build/conversion
Planning	NS Arquitectura y urbanismo
Country	Spain
Region	Basque Country
City	Hondarribia
