Volksbank Tübingen refurbishment

State-of-the-art window technology in a listed building.

The authentic exterior of the Tübingen head office of the “Volksbank in der Region” cooperative bank, refurbished in 2021, is largely owed to Finstral's ability to respond to practically any building situation. The challenge posed by this listed structure was to preserve the original look of the historic building while optimising its functional performance. Round-arch, circular and traditional window shapes, complemented by FIN-Vista window walls with subtly orchestrated glazing bars, ensure that the nineteenth-century round-arch style retains its vibrancy and blends harmoniously with the modern façade components.

The slim aluminium sash profiles on the interior and exterior add a light touch to the formal richness while Sablé Anthracite tones with their slightly grainy texture vouch for vivid reflections. At the same time, our uPVC profiles, always corner-welded with optimum insulation values in the core, deliver uncompromising functional performance.

Type of building	Public building
Construction	2021
Project Planning	Monument/ensemble kkk Dreika Bankprojects
Country	Germany
Region	Baden-Württemberg
City	Tübingen

Products used

U_w - Heat transmittance coefficient of window element

R_w - Sound insulation properties of a window

npd - No performance determined

FIN-Project Slim-line 78/88

aluminium-aluminium

U_w 1-sash 2-/3-glazing:

1,2 / 0,77 W/m²K

U_w 2-sash 2-/3-glazing:

1,2 / 0,91 W/m²K

R_w Standard:

38 (-2;-6) db

R_w Best value:

44 (-1;-4) db
