New day nursery in Wipptal

What do Finstral windows and learning windows have in common?

Quite a lot, actually. For, alongside the educational companions, interior design is known to have an impact on child development and learning. In this 2023-built day nursery in the north of South Tyrol, Finstral has tailored its window solutions to the needs of the youngest children. The large glass areas make the learning environment as pleasant as possible: they flood the indoor spaces with daylight while ushering nature into the interior.

Thanks to its excellent insulating properties, the FIN-Project window system protects against all types of noise disturbance. The public building also benefits from the high energy efficiency and low maintenance offered as standard by our products thanks to their high-grade constituent materials and outstanding design. Not only is the aluminium in Grey Brown matt, specified as the interior and exterior frame material, very easy to clean, it also chimes perfectly with the timber façade and bright interior design concept.

Type of building Public building
Construction 2023
Project Planning New build/conversion
 Architekt **Andreas Vallazza**
